Reasons for Allowance

Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art fails to disclose or render obvious the claimed combination including a fresh air quantity reference value setting means for setting a reference value for the fresh air quantity in accordance with an operating state of the engine; failure detecting means for detecting abnormality of said fresh air quantity detecting means, based on a result or comparison between the fresh air quantity detected by; said fresh air quantity detecting means and the reference value set by said fresh air quantity reference value setting means an EGR passage for allowing part of exhaust gas to be recirculated from an exhaust system of the engine to the intake system as EGR gas; an EGR valve inserted in said EGR passage, for controlling a quantity of the EGR gas by varying an opening thereof; target opening setting means for setting a target; opening for said EGR valve in accordance with the operating state of the engine such that an air-fuel ratio or excess air ratio of the exhaust system becomes equal to a predetermined value corresponding to the operating state; and EGR valve control means for controlling said EGR valve in accordance with the target BGR valve opening set by said target opening setting means, wherein said fresh air quantity reference value setting means sets the reference value in accordance with not only the operating state of the engine but also the target EGR valve opening set by said target opening setting means.
